

Premium Archwires

Quality Manufacturing. Exceptional Service.

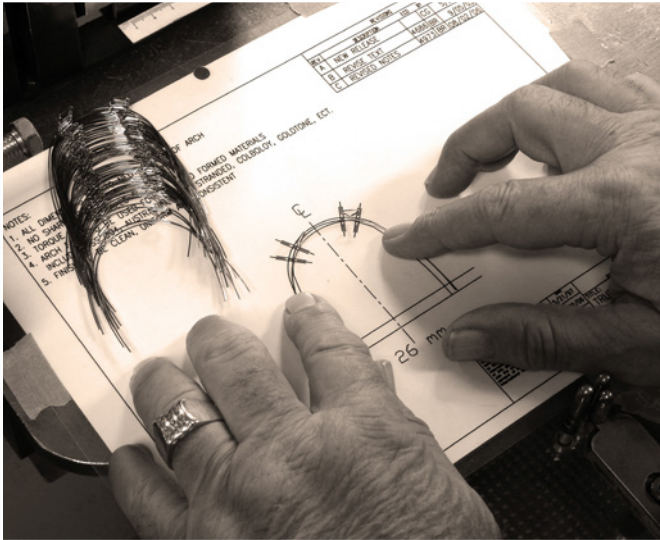

ORTHODONTICS®

Quality Manufacturing. Exceptional Service.

Dedication to quality manufacturing that began more than **40 years ago...**

Forty years ago, G&H Orthodontics began by creating archwire. Since then, G&H has grown into a full line orthodontic supplier – manufacturing not only wires, but brackets, bands, tubes, elastomerics, and more – all made in the U.S.A. G&H prides itself on high-quality precision manufacturing, ensuring the finest products for optimal clinical results.

An archwire may be perceived by some to be a commodity item, however, G&H knows the integral role the archwire plays in achieving successful clinical outcomes. Every wire alloy demands specific processing techniques to fully express its consistent tooth-moving properties. There are many engineered processes that go into making G&H wires second to none in the industry.

Proprietary wire formulations with only the highest quality alloys ensure consistent quality.

STEP 1

Highest Quality Raw Material

Finished wire is only as good as the raw materials that are sourced.

Features

- Sourcing of the purest raw wire across all alloys
- Formulated to our proprietary specifications

Benefits

- Consistent, effective tooth-moving performance
- Highly resistant to breakage
- Decreased deformation

Wire is wound onto precise forms of different sizes and shapes.

Heat-treatment sets the archform shape to wire.

After heat-treating, the wire around the form is cut across the middle on both sides of the form, creating individual archwires.

Wires are mechanically polished in a proprietary media with an abrasive polishing agent ensuring the best wire surface for optimal sliding mechanics during clinical treatment.

An ultrasonic, aqueous cleaning removes all soils and contaminants from wire.

STEP 2

Precision Wire Forming/Heating

Raw wire from the large spools is wound onto precise forms of different sizes and shapes that coordinate to the desired upper and lower archforms. These wire-wrapped forms are then heat-treated with our proprietary methods which sets the wire to the desired shape and establishes the properties of the wire. Additional heat-treatment processes are used for creating dimples, reverse curve, and posted wires.

Features

- Specialized forms set the archform shape
- Proprietary heat-treating and cooling process developed and perfected over decades
- Exact transformation temperature control

Benefits

- Consistent wire properties maintained during clinical treatment
 - Force values
 - Archform shape

STEP 3

Mechanical Wire Polishing

An essential process prior to final inspection.

Features

- Proprietary mechanical polishing techniques
- Aqueous cleaning

Benefits

- Clean, smooth wire, free of irregularities
- Reduced coefficient of friction for optimal tooth movement

Archwire Varieties for Every Alloy

Precision Manufactured in the U.S.A.

TOP SELLER!

M5™ THERMAL COPPER NICKEL TITANIUM

Available in:

- All Archforms
- Pre-Stopped
- Lingual Arches
- Reverse Curve

TOP SELLER!

G4™ NICKEL TITANIUM

Available in:

- All Archforms
- Pre-Stopped
- Lingual Arches
- Pre-Torqued
- G4orce™ Triple Force
- Ultraesthetic™
Tooth-Colored
- Reverse Curve

TOP SELLER!

TITANMOLY™ Titanium Molybdenum

Available in:

- 5 Archforms
- T-Loop
- Lingual Arches
- Nickel-Free

TOP SELLER!

S304 VM Stainless Steel

Available in:

- All Archforms
- Ultraesthetic™
Tooth-Colored
- Lingual Arches

ULTRAESTHETIC™ TOOTH-COLORED

Available in:

- 5 Archforms
- G4™ NiTi
- Stainless Steel
- Reverse Curve
- Pre-Stopped

Multi-Strand Stainless Steel

Available in:

- 2 Archforms
- Four Strand Varieties:
3-Strand
6-Strand
7-Strand
8-Strand

REVERSE CURVE NICKEL TITANIUM

Available in:

- RC 1 & 3
- Europa™ II
- Pre-Stopped
- Pre-Torqued
- Thermal Copper
- Ultraesthetic™ Tooth-Colored

XR1™ HEAT-TREATED STAINLESS STEEL

Available in:

- All Archforms
- Brass Ball-Post Posted Arches

LOOPED STAINLESS STEEL

Available in:

- Trueform™
- T-Loop
- Keyhole Loop

POSTED STAINLESS STEEL

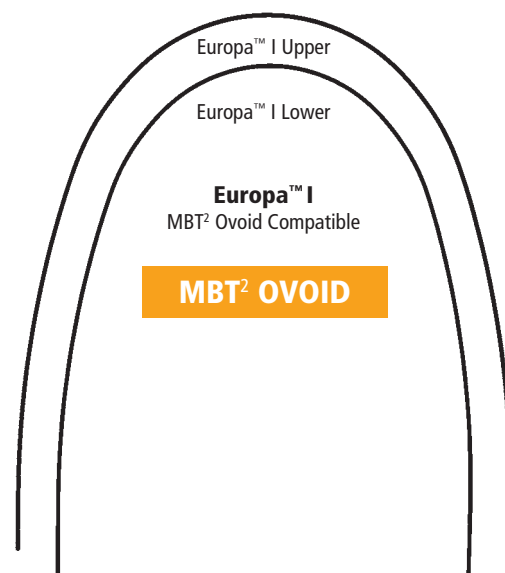

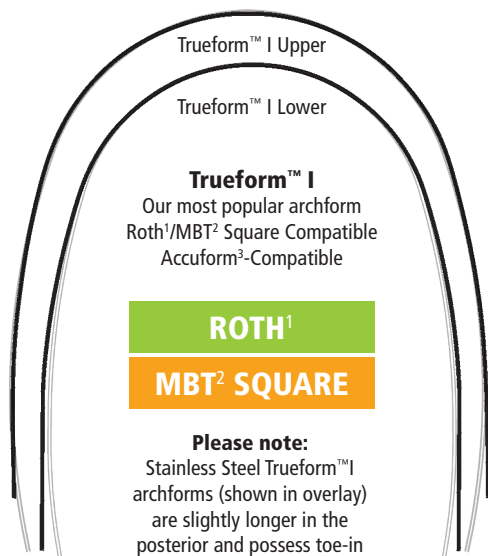

Available in:

- 4 Archforms
- Heat-Treated w/Brass Ball-Post
- Straight Brass Post

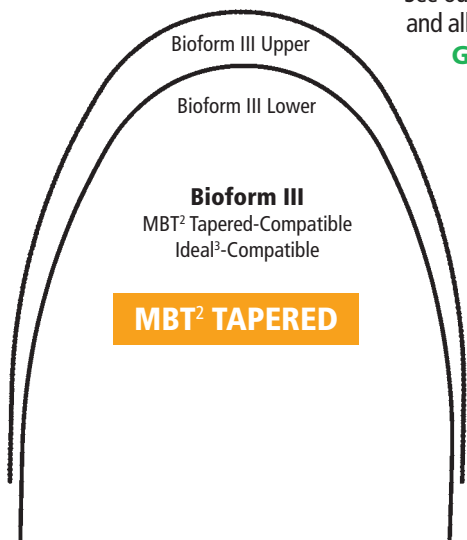

**Archwire

Our most popular archforms (Shown actual size)

33 ARCHFORM OPTIONS!

See our complete variety of shapes and alloys in our catalog online at:
GHOrthodontics.com

Permanent, electro-etched midline ID

- Three-etch lines for UPPER
- One-etch line for LOWER

Note: Australian wire and tooth-colored wires are ink-midline marked only.

¹G&H® prescriptions are not implied to be an exact version of any other system, nor do we claim any endorsement by the doctor.

STEP 4

Scientific Quality Testing & Final Inspection

Quality control is critical to precision manufacturing.

ANSI/ADA Specifications #32, Orthodontic Wires: 2017

Features

- Continuous, meticulous testing of each lot
- 14 separate quality tests
- 28-point, 100% final inspection
- All wires must successfully pass all testing prior to packaging

Benefits

- Guaranteed performance characteristics
- U.S. manufactured under stringent quality control

All archwires are manufactured in the U.S.A. with the most stringent quality monitoring.

All archwires are evaluated for consistency of shape.

The diameter of all wires is tested for consistency of size.

Quality management system -
ISO 13485:2016 & EN ISO 13485:2016

STEP 5

Unique Packaging

Easily identifiable, secure packaging.

Features

- Easily identifiable color coding & labeling
- Lot traceability
- Autoclavable Solo-Pack™ wire packaging available

Benefits

- Easy to use
- Hygienic/sterilizable

G&H Solo-Pack™ autoclavable packaging

G&H is at the forefront in the industry in providing autoclavable, individual archwire packaging consistent with the highest standards of hygiene.

Solo-Pack™ autoclavable packaging.

You can be sure...

only wire that meets our rigorous quality control standards is packaged and delivered. Our wire packages are easily distinguishable, readily accessible, and provide secure wire containment. All of our wire packages provide lot traceability so that precise manufacturing information is available.

ORTHODONTICS®
Quality Manufacturing. Exceptional Service.

Our Mission –
“To provide our customers a great experience achieved through quality manufacturing and exceptional service.”
